Belarc's End-User Products

PC Management for the Internet Age

BelManage is the PC management system for the Internet Age. It allows organizations to **easily manage** all of their desktops, servers, laptops and remote systems throughout the world with one BelManage Web server. For more information and a demo, please [click here](#).

BelAsset is targeted for use by smaller groups of PCs. It offers many of the asset tracking features of BelManage, but requires more manual operation. For more information and a demo, please [click here](#).

BelManage
PC Management for the Internet Age
[Try BelManage](#) | [White Paper](#) | [Pricing](#) | [Purchase](#)

BelManage is the PC Management system designed for the Internet Age. It allows you to manage all of your **workstations, servers and laptops throughout the world**, simply using one BelManage Web server. Why base your PC management on systems which require a hierarchy of specialized servers and VPN connections? Other BelManage features include the following:

- **Asset Tracking.** Detailed hardware and software reports for Windows 2000 upgrades, software license compliance, hardware upgrades and more.
- **Help Desk** features such as PC profile snap-shots and detailed change reports.
- **Performance Monitoring** of important parameters such as hard drive S.M.A.R.T. status, network activity, CPU utilization, reboots, temperature, voltage and more.
- **eSupport automation** tools for the IT Manager. Our **IT Friendly™** feature allows pro-active health checks and notifications to be shown to the IT Manager and not to the end-users.
- **Software and driver updates** via a Web browser. Also allows mobile users to have some control over when they download and install the update.
- **Targeted communications** with select groups of end-users via their Web browsers.

[Click to see sample BelManage pages.](#)

[Click to try BelManage](#) and find out why our current customers chose to use Belarc's products:

BelManage (Intranet version) is **priced** as follows:

- \$20/PC up to 5,000 PCs; \$15/PC from 5,001 to 10,000 PCs; \$10/PC over 10,000 PCs.
- Includes six months of updates and support.
- Minimum order of \$5,000 or 250 PCs.
- 90 Day full money back guarantee.
- Contact us for our reseller program.

We also offer BelAsset for smaller systems. BelAsset offers basic asset tracking features, but does not offer many of the automated features of BelManage. For more info on BelAsset, please [click here](#).
